General certificate:OOO

White book

Sign: Everyone can have fun

Date: June21, 2021

The record

1、 Front view

With the rapid development of science and technology, society, people's pressure gradually increased, life needs other ways to relieve the pressure, related to all kinds of live broadcast, dating, chat software endless, each platform has a corresponding points system, when the user registered to become a platform need to enjoy value-added services, need to use the traditional French currency top-up into the platform points or traditional French currency direct payment purchase and other ways, the traditional payment channel regular problems have network congestion, limit, freeze, Wind control is abnormal, and most of them are only for single language users, privacy is not guaranteed, if you look at global payments, exchange rates is a cumbersome problem, with the birth of OOO, we firmly believe that soon will be a good solution to this type of problem, become a global social software common points.

Based on the above environment, the OOO team developed blockchain projects on the Wave Field Tron network to address the asset trading scenarios in this industry, with the aim of providing a more efficient, convenient and secure blockchain trading approach to asset trading in the global social application scenario, thanks to blockchain, anyone and business entities can enjoy the silky experience of asset management and trading more quickly, conveniently and securely.
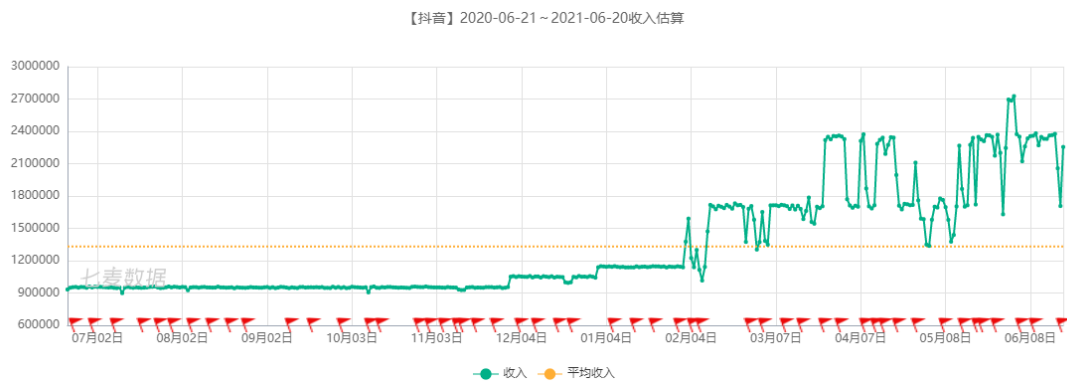

2、 The status of the industry

Short Video - Shake Tone:

2020-06-21 to 2021-06-20 Total downloads estimated: 69,109,032

【抖音】近一年下载量估算
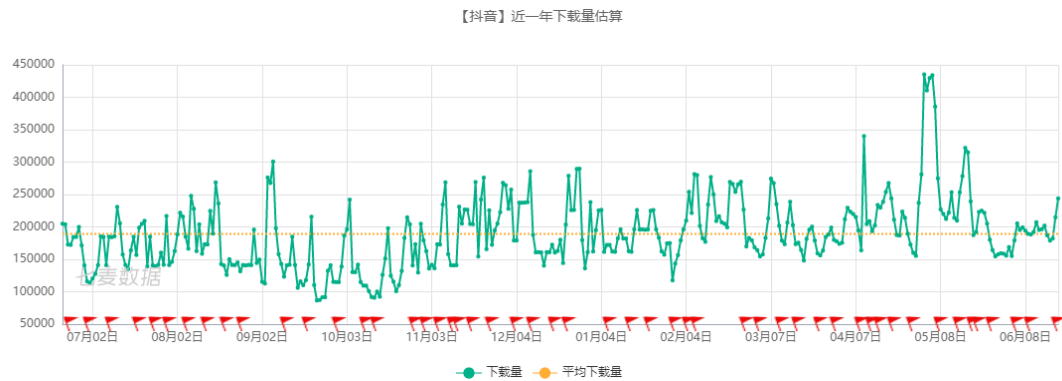

2020-06-21 to 2021-06-20 Total estimated revenue: $485,665,185

【抖音】2020-06-21～2021-06-20收入估算

Visible short video rise of the wave of live tape, users continue to increase the intensity of purchase, estimated to reach $485,665,185, the following is the jitter app built-in issue of points (shake currency, DOUplus).

抖音短视频 7抖币	¥1.00
42抖币	¥6.00
210抖币	¥30.00
抖音DOU+ 98元	¥98.00
抖音抖币包686抖币	¥98.00
50抖音DOU+	¥50.00
2086抖币	¥298.00
210抖币	¥30.00
3626抖币	¥518.00
抖音DOU+ 198元	¥198.00

Social-Stranger:

2020-06-21 to 2021-06-20 Total download estimates: 8,681,214

【MOMO陌陌】近一年下载量估算
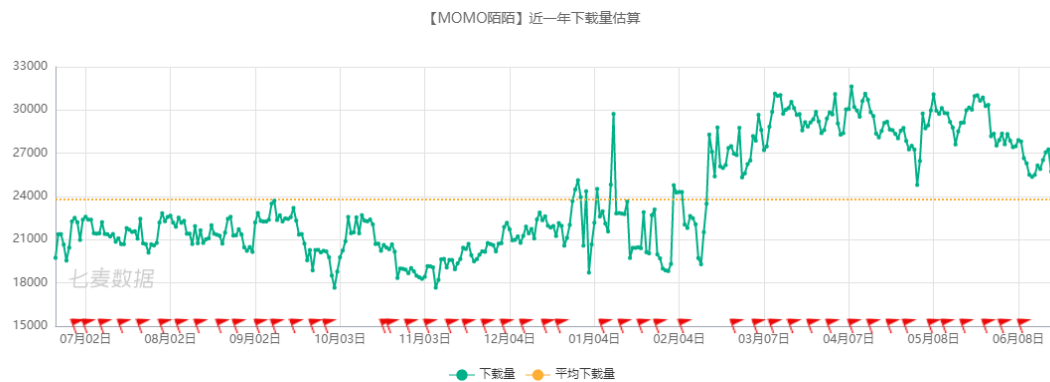

2020-06-21 to 2021-06-20 Total estimated revenue: $17,190,809

【MOMO陌陌】2020-06-21～2021-06-20收入估算
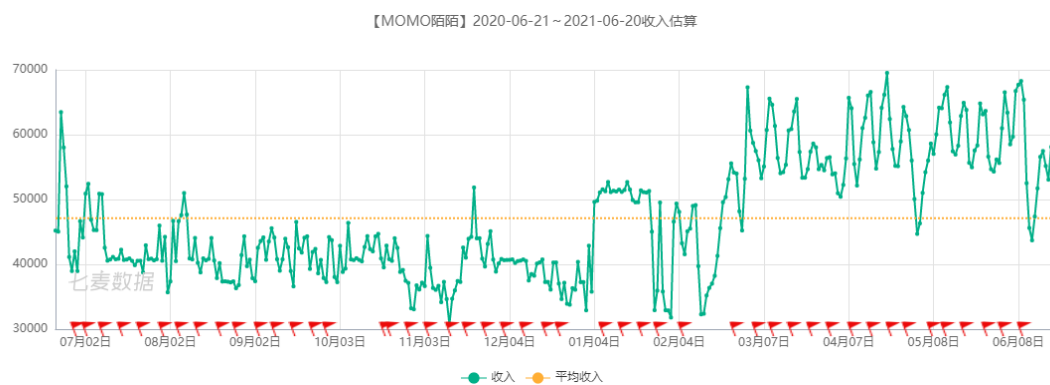

Old social software, under the banner of about X, in recent years, although the impact of the new young social platform, its users, top-up is also a slow upward trend, the following are the stranger app issued within the points and membership services:

6元陌陌币礼包	¥6.00
陌陌会员自动续费服务	¥12.00
陌陌会员自动续费服务	¥12.00

Each of these platforms has its own ups and downs, of course, in the face of the global market only the tip of the iceberg, the associated applications app countless, whether you encounter no VISA card to pay overseas application points, channel payment anomalies, cross-platform exchange rates and communication network problems, hope that the common points to achieve zero exchange rate, cross-operating system, Network confirmation is fast and more secure and private, OOO Certificate was invented to simplify points, membership process,OOO in practical applications will be equivalent to the original points, membership, services within the platform.

3、 solution

3.1,social

Solve social software often use registration invitation code, membership, virtual merchandise items and other points services.

3.2, reward

Solve Social, live-streaming software that feels appreciated and can berewarded worldwide with OOO tokens.

3.3, Entertainment

Solve the problem of unstable, insecure and insecure traditional payment system in the entertainment industry.

3.4, safety

To solve the security problem of personal assets, OOO is a blockchain project issuedon the wave field Tron network, keep your mnemonics, do not easily scan unknown QR code, do not back up on the network, your OOO assets will be very secure, blockchain has high anonymity, anonymous, can not tamper with the characteristics, you have more OOO assets as long as stored in the decentorized wallet also need not worry will freeze the issue.

3.5, private

One of the reasons blockchain is so popular is thatit is more private,OOO distribution blockchain project is exactly what sees in not being named is the characteristic of blockchain project, as long as your assets are not placed in a central wallet or exchange, your assets will not be known except yourself.

4、 Economic model

4.1, value generation

OOO pass value Generation pre-generation consists mainly of the following three categories, the fourth category is a long-term and lasting goal:
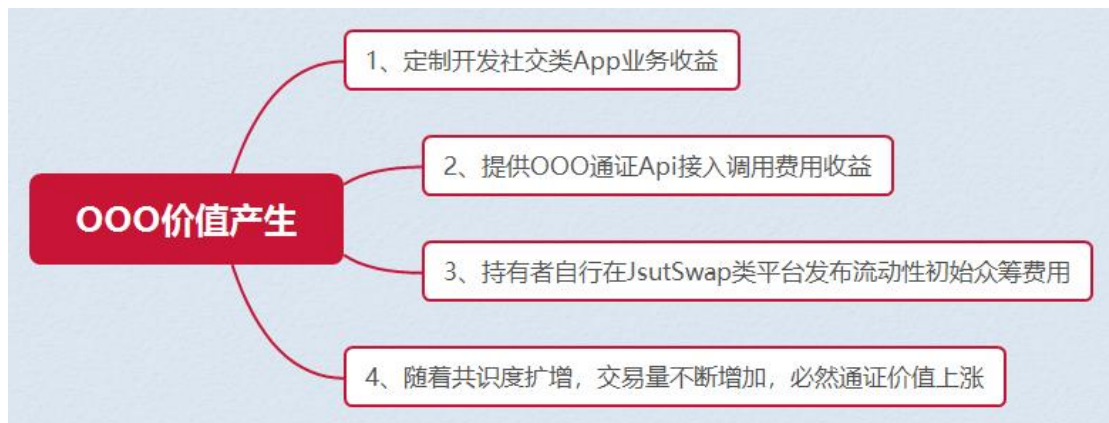

1、 Custom development social class App benefits:

With 9 years of Web,App development experience and technical backbone proficient in the Swoole-Web Socket protocol, the OOO team has now completed the development of the IM system on its own, and system sales and secondary custom development maintenance will only accept OOO as a single payment method,OOO_IM system built-in OOO charge block interface, no additional docking, other systems can provide SDK adaptation, OOO_IM system does not require external SDK communication module, deployment complete to go live operation, multiple optimization of business logic, with load balancing can easily achieve 50,000 people online at the same

time No catton,　Each time the team sells a system, it is used to buy back OOO assets.

2、　Pass-through blocks pay for interface fees:

Social software developed in other languages requires docking OOO projects as a charging entry, and we provide the corresponding SDK,which ischarged for the number of calls.

3、　Holder crowdfunding fees:

The first holders can make their own money by publishing mobile poolson the JsutSwap platform,OOO initially opens up crowdfunding, and crowdfunding costs are invested in official announcement activities.

4、　The transaction generates value:

With the above three items advancing, the increase of consensus will inevitably lead to an increase in the value of the general certificate.

4.2, asset allocation

OOO Certified Assets are allocated as follows:

空投活动：15.15% —

NFT：5.05% —

社区：5.05% —

交易所：20.2% —

项目方：3.03% —

— 流动池：51.52%
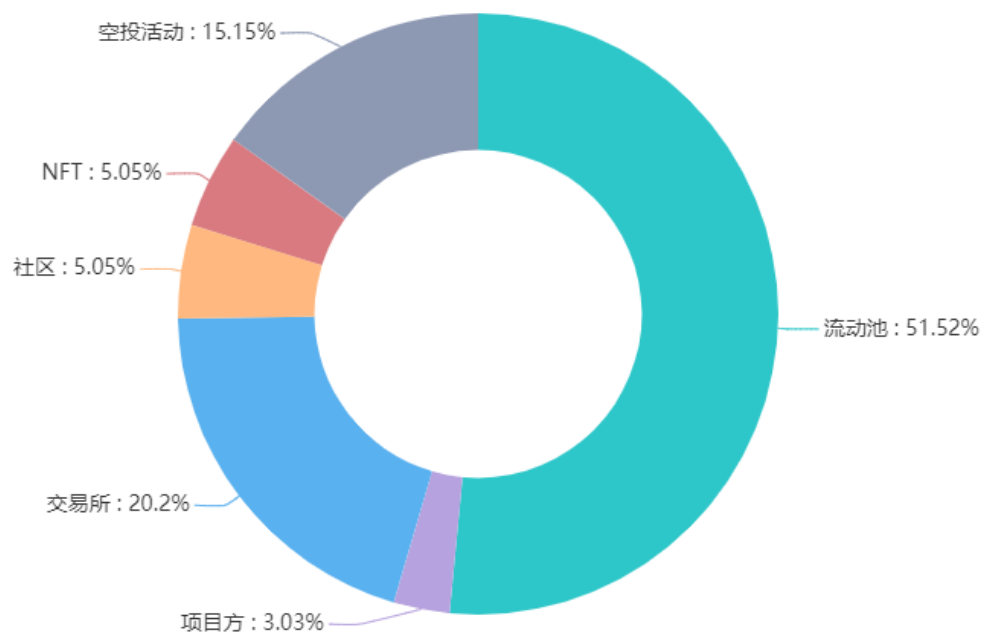

1、 Flow Pool 51.52 %:

Most of the liquid pools effectively increase the liquidity of OOO

assets

2、 Project party 3.03 %

The project party retains only3.03% of the share and is divided into

three years of delivery

3、 Exchange 20.2 %

Set aside20% of the share for the later currency exchange

4、 Community 5.05%

Used to reward community Kol for OOO project support

5、 NFT 5.05 %

Used to make physical NFT rewards long-time believers

6、 Airdrop Activity 15.15 %

Initially, improve consensus Airdrops, participation in activities awards

5、 Release information

Project bottom:

throne

Token symbol:

one on one（**OOO**）

Contract address:

TEmbiFVgM6K67RNrJBeGdeHAomcDH6ygSx

Accuracy:

0

Number of tokens:

999999999999

Project Brief:

OOO based on wave field TRON as the underlying technology release, aimed at opening up the global social software common points consensus, the use of blockchain to protect privacy and create a good online dating environment, eliminating complex trading patterns and exchange rate differences, so that everyone can open their hearts one-on-one.

Community Kol Autonomy Concept:

Splitting the creation of mobile pool address account mnemonics

into1 2 copies to be managed separately by Community K ol,

community Kol Management Liquid Pool **Account Concept** is the first issue by

an O OO project and will be sent byKol from aroundthe world in accordance with

the top12 votes cast, a move that ensures that OOO projects are

almost impossible to withdraw from the mobile pool.

6、 Development route

OOO Pass Development Route is planned for a total of six steps:

空投阶段
众筹阶段
上线交易所(去中心化)
对接媒体资源
对接社交平台
上线交易所(中心化)
OOO发展路线

1、 Genesis airdrop phase

OOO only drops 7Day active addresses, zombie addresses will not be able to get airdrops.

2、 Crowdfunding phase

Open crowdfunding phase to support the first batch of holders to self-service mobile pool to earn a pass.

3、 Online exchanges (decentralized)

Live wave field TronTrade trading.

4、 Dock media resources

Connect mainstream blockchain media resources and deliver O OO-certified news.

5、 But the social platform

But the Social Properties app platform, apply the scene, and facilitate the holder.

6、 Online exchange (centralization)

Online mainstream exchanges Co inbasePro,Binance,OKEX,Huobi

7、 Governance architecture

The OOO project is aconsensus document initiated by the Global Social App team, andthe OOO governance architecture was created to ensure that the certificate maintains healthy growth and creativity in the Tron network ecosystem, and that all initial revenue project parties are put into the liquid pool To ensure a steady increase in asset value, and to ensure the normal circulation of OOO, with late-stage revenues from Community Ko I,the project party and the top 100 coin addresses to discuss where to go and be as transparent as possible.

8、 Risk tips

Market has a deal to produce there are ups and downs, please control the good mood, fully recognize the project and the application value behind it can participate in investment, the project party can not guarantee how many times the appreciation of assets commitment, can only do your part to let you enjoy the currency holders should have a variety of rights and benefits, the same reason, the project party will not and can not maliciously smash the road, after all, the project party holding only 3% and released in 3 years, the most important thing is that this is not a short-term project, This is our common long-term goal,   OOO project market application scenario is very large, the longer the holding time the probability is doubled, the total amount of issuance fixed no issuance,   most of the pass is scattered out, the project side only holds 3% of the share, the rest in the hands of the vast number of users, this mechanism can effectively prevent large-scale sell-off, resulting in a sharp dive in assets phenomenon, but still hope you Control your own risks and configure virtual assets within your capabilities.

9、 Disclaimer

1. Attitudes and policies on financing for digital currencies and blockchain projects in the world's major countries are not yet clear and may result in loss of investors due to regulatory policies, among

other reasons.

2. The Foundation and the project team will continue to try to ensure that the information in the white paper is true and accurate, and during the development process, the project party may make relevant project updates, including but not limited to the platform operation mechanism, the general certificate usage mechanism, the general certificate distribution, the project party will spare no effort to achieve the objectives described in the document, however, in the event that the Force Majeure team can not fully make the commitment to complete, can not ensure that all technologies can be achieved.

3. In addition to the above risks, as blockchain project investments remain a new industry, there may be risks that we have not yet anticipated or been able to predict.
